

Ray's Parts & Tools List for Touring

For a long solo trip, I take the following:

carb

generator/alternator

starter

distributor

waterpump

lots of small parts (points, plugs, etc.)

axle shims

tire tube

fan belt

electrical wire and electrical tape

light bulbs

gasket material to make one if needed and black silicone to make a quick gasket

front wheel bearings

extra oil, water and grease

good set of tools and torque wrench

This list will probably get you to the next town.
