T2800-TC Wheel Hub Thread Chaser Instructions

This unit is not designed to cut new threads but to clean up existing threads that have been damaged.

1. For best results and longevity of this thread chaser, always clean hub threads with a wire brush to remove any dirt, grease, or rust.
2. Apply WD-40 or a light cutting oil to the thread chaser and the wheel hub prior to use.
3. Turn the thread chaser with a exhaust wrench or other suitable wrench.

If you like our product , tell your friends. If you have a question or comment, let us know.

Thanks and Smooth Running,
